

Distribution Class 1 general

## Technical Notice

### Implementation of the REACH Regulation by Tadiran Batteries

On 1 June 2007 Regulation (EC) No 1907/2006 concerning Registration, Evaluation, Authorization and Restriction of Chemicals ("REACH" for short) came into force.

#### 1. REACH contains the following regulations:

1. From 1 June 2008, manufacturers of substances, and importers of substances as such or of substances in preparations (mixtures) into the European Community (EC) and the European Economic Area (EEA), must register these substances with the European Chemicals Agency if the substances in question are manufactured or imported in quantities of at least 1 t/a and if they are not substances that are exempted from compulsory registration. So-called "phase-in substances" – these are, for example, substances that are shown on the existing substances list EINECS – can be pre-registered between 1 June 2008 and 1 December 2008. Pre-registered substances do not have to be registered until later, depending on the quantity manufactured/imported.
2. Suppliers of substances and preparations must provide the recipient with either a safety data sheet (Article 31) or safety information (Article 32). In certain cases, the safety data sheet will be supplemented by an annex ("extended safety data sheet") showing the relevant exposure scenarios.
3. Manufacturers and importers of articles that contain more than 0.1 mass per cent per article of a substance on the "candidate list" shall provide the professional recipient and on request a consumer of the article with sufficient information to allow safe use of the article, including, as a minimum, the name of that substance. If all these articles contain more than 1 t/a a notification to the European Chemicals Agency (ECHA) is necessary, however, not before 1 June 2011.
4. From 1 June 2008, users of chemicals (substances and preparations/mixtures) – so-called "downstream users" – will have to comply with other obligations, but in some cases only after they have received an extended safety data sheet. Downstream users can provide appropriate information so as to assist the manufacturers of substances and importers of substances and preparations in registering them.

## 2. Implementation by Tadiran

Tadiran Lithium Batteries are articles (not chemicals) which are not intended to release any substance under normal and reasonably foreseeable conditions of use. Consequently, the obligations in No. 1 and 2 above are not relevant here.

"Candidate lists" have been published since firstly on 28 October 2008. As soon as the relevant data are available from the supply chain we keep our customers informed. However, as far as we know, at present, our articles do not contain any substances above 0.1 mass-per cent per product that are listed on the candidate lists published so far.

These currently include the 242 SVHC materials published in the following lists:

No.	List published	No.	List published
I.	28.10.2008	II.	13.01.2010
III.	18.06.2010	IV.	15.12.2010
V.	20.06.2011	VI.	19.12.2011
VII.	18.06.2012	VIII.	19.12.2012
IX.	20.06.2013	X.	16.12.2013
XI.	16.06.2014	XII.	17.12.2014
XIII.	15.06.2015	XIV.	17.12.2015
XV.	20.06.2016	XVI.	12.01.2017
XVII.	07.07.2017	XVIII.	15.01.2018
XIX.	27.06.2018	XX.	15.01.2019
XXI.	16.07.2019	XXII.	16.01.2020
XXIII.	25.06.2020	XXIV.	19.01.2021
XXV.	08.07.2021	XXVI.	17.01.2022
XXVII.	10.06.2022	XXVIII.	17.01.2023
XXIX.	14.06.2023	XXX.	23.01.2024
XXXI.	27.06.2024	XXXII.	07.11.2024

Through communication with our suppliers of chemicals, we will try to safeguard the delivery of all chemicals which are necessary for us.
